

Clarif FileMaker 2025 Release

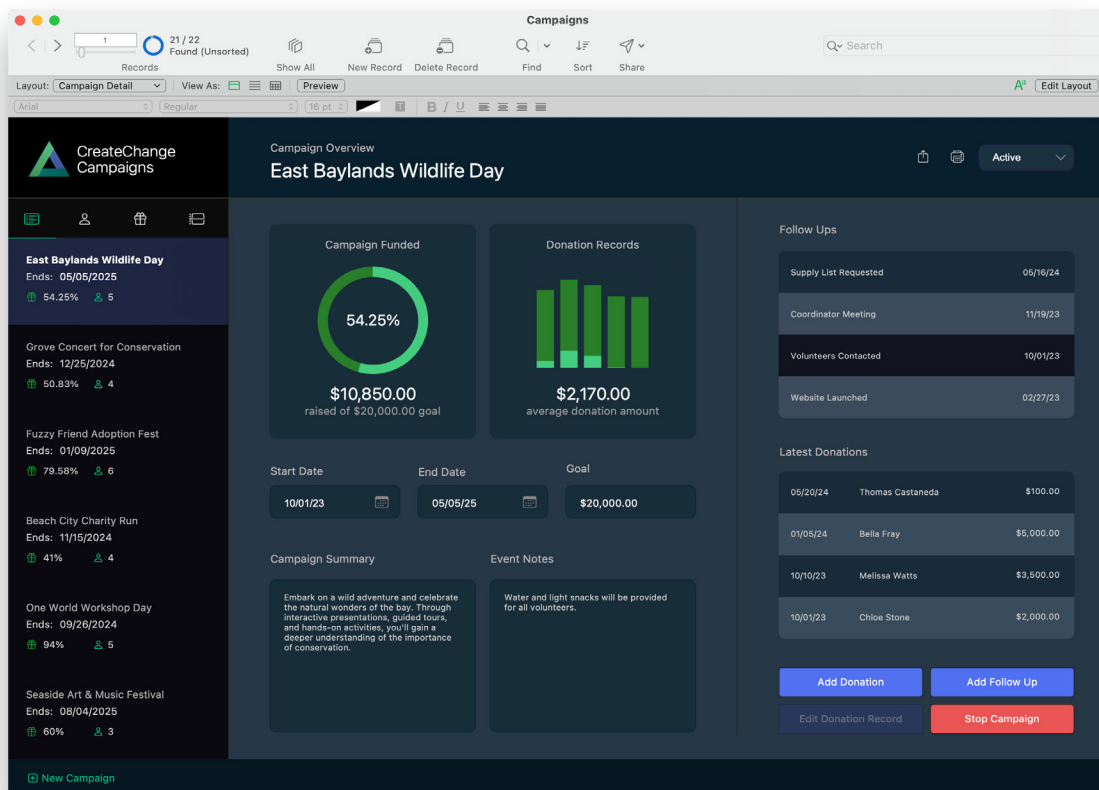

You get to create AI-powered solutions by building on your FileMaker foundations with the data you already have, all through a unified platform.

FileMaker 2025 empowers you to innovate faster by seamlessly integrating AI capabilities with your existing data and tools.

Continue leveraging the core FileMaker functionalities you trust while accessing groundbreaking features that drive your success in a connected world.

claris.com/filemaker

- **Embrace AI with Ease:** Unlock AI-driven insights and automation using your current datasets. FileMaker 2025 makes advanced LLM-powered capabilities accessible without the complexity.
- **Unified Platform Strength:** Build sophisticated, web-connected solutions utilizing the comprehensive Claris platform. Enjoy simplified onboarding and enhanced data interoperability across FileMaker and other Claris tools.
- **Evolve with Confidence:** Rely on continued investment in developer resources and engage with a supportive community. Together, we navigate this journey of learning and digital transformation.

What's new in FileMaker 2025

- **AI Integration:** Seamlessly bring AI features into your solutions leveraging existing data, positioning your applications at the forefront of technological advancement.
- **Enhanced Security:** Stay protected with ongoing security enhancements, including updates to foundational protocols ensuring robust application integrity.
- **Streamlined Web Connectivity:** Develop superior web solutions with improved tools and simplified processes for integrating FileMaker with broader web technologies.
- **Expanded Developer Support:** Benefit from rich new content and community interactions designed to support you at every stage of your development journey.
- **Collaborative Innovation:** Join a community of innovators on a shared path of growth, supported by Claris' commitment to mutual progress and learning.
