

# 2026 Release Copy Blocks

## Claris FileMaker platform

<i>25 word</i>	Build AI-powered, resilient business solutions with FileMaker 2026 — featuring disaster recovery, enhanced accessibility, developer productivity improvements, and AI-ready architecture.
<i>50 word</i>	FileMaker 2026 transforms how you build and operate business solutions. With AI-ready architecture, built-in disaster recovery, improved accessibility, and dozens of developer productivity enhancements, FileMaker 2026 delivers a platform designed for intelligent, resilient operations — all within the unified Claris ecosystem your team already trusts.

## Claris FileMaker Pro

<i>25 word</i>	FileMaker Pro 2026 boosts developer productivity with a smarter Inspector, custom function sorting, precise zoom control, calculation-driven field entry, and AI-optimized schema metadata tools.
<i>50 word</i>	FileMaker Pro 2026 introduces powerful developer quality-of-life improvements: a redesigned context-aware Inspector, folder-based custom function sorting, and precise decimal zoom control. New calculation-driven field entry removes layout workarounds, while FieldAnnotation and BaseTableComment functions make your schema AI-ready — enabling smarter integrations and more maintainable, future-proof solutions.

## Claris FileMaker Go

<i>25 word</i>	FileMaker Go 2026 adds flash/torch control for barcode scanning, native Japanese calendar support, and WindowUUID — delivering a more capable mobile experience on iPad and iPhone.
<i>50 word</i>	FileMaker Go 2026 expands mobile capabilities with a new flash and torch option for barcode and camera workflows, native Japanese calendar support in date pickers, and WindowUUID calculation support for multi-window management — fast, powerful, and free on the App Store.

# 2026 Release Copy Blocks

## Claris FileMaker Server

25 word	FileMaker Server 2026 delivers enterprise-grade resilience with Remote Backup, Standby Server failover, multiple SASE processes, auto-restart after crashes, and native Export Field Contents support.
50 word	FileMaker Server 2026 is built for resilience and scale. Remote Backup protects your data off-site every 20 minutes, while Standby Server enables rapid failover in minutes. Multiple SASE processes improve throughput, auto-restart of WPE, OData, and Data API reduces downtime, and native Export Field Contents eliminates plug-in dependencies — on macOS, Windows, and Linux.

## Claris FileMaker WebDirect

25 word	FileMaker WebDirect 2026 improves accessibility with screen reader support, semantic HTML, and better keyboard navigation — plus IPv6 compatibility, JDK 21 support, and performance improvements.
50 word	FileMaker WebDirect 2026 takes a meaningful step toward inclusive web deployment. Enhanced screen reader support, improved focus management, and updated semantic HTML and ARIA attributes help your solutions meet modern accessibility standards automatically — no redesign required. JDK 21 support, IPv6 compatibility, improved cookie handling, and tabbing performance improvements make WebDirect more enterprise-ready than ever.

## Claris FileMaker Cloud *(coming soon)*

25 word <i>[coming soon]</i>	FileMaker Cloud 2026 delivers the latest AI-ready platform enhancements in a fully managed environment — available approximately 30 days post-launch, with updated security and accessibility.
50 word <i>[coming soon]</i>	FileMaker Cloud 2026 delivers the full power of the FileMaker 2026 platform in a fully managed, secure cloud environment — available approximately 30 days post-launch. Benefit from OpenSSL 3.5 LTS security, AI-ready schema tools, WebDirect accessibility improvements, and every developer productivity enhancement — without managing your own infrastructure.
